MOBILITY

FUZE T50

With its effortless center-of-gravity pivot, the Fuze T50 Manual Tilt-in-Space wheelchair offers up to 50° of tilt. It is designed for users who need pressure relief or routine repositioning for postural or access reasons. Offering a wide range of adjustability and options, the T50 is one of the most adaptable wheelchairs available today.

A Adjustable Seat Height

13" to 20" of front seat height to optimize occupant tilt performance.

B Adjustable Axle and Seat Position

Adjust the center of gravity location to optimize mobility requirements.

C Adjustable Seat Depth and Back Rest

A large selection of seat depth options and up to 36 degrees of back angle adjustment for general positioning and comfort.

D Adjustable Chair Width

On-board adjustability of the chair needs to accommodate occupants growing need.
